STORMWATER MANAGEMENT AND EROSION CONTROL
 All work to be performed in order to maintain all project grounds, public streets and associated areas, including the areas in a manner consistent with the general policy to conserve soil and soil resources, and to control and prevent soil erosion and to control and prevent siltation into rivers, streams and ditches. The clause is to be liberally construed to further the above stated objectives. The following shall include, but not limit areas in which control is to be executed:
 Minimum Striping: Drive to mark striping of soil and vegetation to a period that will expose one end to least possibility of erosion that construction requirements will allow.
 Blockpiling: Material shall be stored in a manner that will not runoff of stockpiled material into streets or drainage facilities in the event of rain.
 Stormwater Runoff and Erosion Mitigation: Take positive measures to prevent soil erosion from the construction site and areas disturbed by construction activities by installing such things as: mulch, blocking arrangements, settling basins, silt checks, riprap, erosion mats or other temporary erosion control devices or methods.
 Street Maintenance: Control the tracking of soil onto street and paved surfaces to a minimum. Any such tracking shall be removed no less than on a daily basis.
