Estimated Volumes

Species	Roundwood (cords)	Whole Tree (tons)
Red Pine*	312	908

* 12" average diameter

Harvest Requirements:

- This sale is a 19-acre red pine plantation (3rd thinning) and is being sold on a Ticket Scale Basis.
- Sale boundaries are identifiable on the ground by abrupt changes in timber types (plantation edges). The north edge of plantation forms the line between the County Forest and private property. No equipment or felled trees may cross beyond the property line which is formed by the northern edge of the plantation.
- There is a chain link fence between the cemetery and the County Forest. Be careful not to damage the fence.
- Sale may be whole-tree harvested but not whole-tree/pole skidded due to possible damage to the residual stand. Bayfield County may, at its discretion, allow whole-tree/pole skidding if the purchaser can demonstrate that it can be done without damaging the residual stand.
- If whole-tree harvested, 1 in 10 tops ($\leq 4''$ diameter) must be left scattered across the site.
- The County may temporarily halt logging out of respect to potential burial and Memorial Day ceremonies at the cemetery.
- **PRESCRIPTION:** Harvest all orange-painted red pine, minimizing damage to residual red pine stand.
- A state-funded ATV trail runs parallel to Battle Axe Road. Trail must be signed for safety when trucks will cross the ATV trail. No decking along the ATV trail.
- Harvested pine cannot be kept on the Bayfield County Forest for more than 3 weeks from May 1st to August 31st.
- To comply with the Best Management Practices for Invasive Species: Prior to moving equipment onto or off of the sale area, scrape or brush soil and debris from exterior surfaces of the logging equipment.
- Decking of wood along town roads will not be allowed without permission from Bayfield County Forestry Department
- This contract requires County authorization for all road/landing construction and places a number of other requirements on road construction and closure. (refer to Section 17)
