				12-14"	187	238	

TRACT 57-20 – HARVEST REQUIREMENTS

The following terms and conditions supplement those provided in the Bayfield County Timber Sale Contract.

A. PRESCRIPTION:

- Unit 1: Harvest is a salvage coppice prescription with an estimated average residual basal area of 10 ft². Approximately 40% of the wood is storm damaged from the July 18th windstorm. Not all of this wood is laid down flat. Most of the damaged wood is simply bent over but still standing. The remaining damaged wood is root sprung, snapped off, flat on the ground, etc.

B. HARVEST REQUIREMENTS:

- Unit 1:
 - Harvest all hardwood 2" in diameter and greater. Leave all conifer.

C. OPERATIONAL REQUIREMENTS AND SEASONAL RESTRICTIONS:

- Sale boundaries are red line and blue line.
- There is a drainage as noted on the map where the larger portion is painted out but the drainage extends into the sale. Minimize crossing this drainage and reach in to utilize as much wood in the actual drainage.
- If harvest will utilize the whole tree, 1 in 10 tops must be left scattered throughout the sale.

D. ACCESS AND ROADS:

- The county has secured the proper DOT permits to access Hwy 13. The contractor will be required to install a 18"X26' culvert with apron end walls.
- Access will be through private property on and old logging road as noted on the map. Some old roads exist throughout the sale area. Access has been secured and approximately 530 ft of new road across flat ground will need to be constructed on private property before you reach Bayfield County land.
- When opening up the existing logging road across the drainage as shown on the map use packed snow, tops, crane mats, etc. in this shallow drainage as approved by the sale administrator. Remove materials used upon completion of the sale.

E. OTHER:

- Approximately 40% of the total volume within this sale have been damaged in some way as a result of a windstorm on July 18. Damage includes root sprung trees, snapped off trees, and various levels of bent over trees.
- There are 2 reserve islands that are painted out in red paint. Do not harvest any trees within these units. The blue line indicates private property. No equipment or felled trees may cross the line. To comply with Best Management Practices for Invasive Species: Prior to moving equipment onto or off the sale area, scrape or brush soil and debris from exterior surfaces to the extent practical.
- This sale contract will expire on **May 31, 2022**.
